

CHECKLIST FOR A GENERATOR

1. Electrical permit application signed by a LMT licensed electrician
2. Plot Plan that shows property lines and house location.
The plot plan must show the footage distance from the generator to the property lines. Generators must comply with zoning setbacks and also comply with the noise ordinance.
3. Manufacture cut sheet – need to know the decibel levels and the manufacturer's specs on distance from building. Generator must be 5' from any window or door.
4. If generator is fueled by natural gas either a plumbing permit or HVAC permit application must be submitted for the gas line. The contractor must be licensed with Lower Merion Township as a master plumber if using the plumbing permit application or as a Master HVAC contractor is using the HVAC permit application.
