Lower Merion Township is dedicated to providing top tier amenities to all of its residents inclusively. An inclusive public playground ensures all users get the chance to benefit from unstructured play. The new playground design provides accessibility for children with all ranges of disabilities.

The playground is designed to create points of interaction, where multiple kids with varying ability levels can simultaneously use specific playground components. The interaction points help reduce exclusion and segregation encouraging kids of all abilities to interact and play with each other.

Ground-Level play opportunities as well as climbing structures, slides, swings and sensory elements create a welcoming environment for all to explore, learn, challenge themselves and stay connected.

Just some of the features include:

- Play panels
- Communication Boards
- Wide slides
- Swings
- Gliders and Spinners
- Sensory elements
- Climbing elements
- Benches and shade structures
